INVESTMENT DISCIPLINE

Greenwich Advisors India Select Fund's central theme is to identify and invest in stocks that we believe to have exceptional growth prospects at the right price, with a view to providing excellent long term returns. The Fund will have a growth bias and will invest primarily in larger Indian companies. However, the Fund may invest in smaller and mid-sized companies if the right opportunities are available. The investment process is a bottom up approach, supplemented by a top down view on sectors. In its research process, the Fund's sub-advisor will focus on companies with strong fundamentals and strong earnings growth. The Fund's sub-advisor will identify stocks that meet the above criteria and will assign a target price prior to purchasing a position.

The portfolio will typically consist of between 25 and 40 stocks in multiple sectors. The typical holding period for a stock will exceed one year. A stock is considered for sale if the sub-advisor believes the stock price completely reflects its fundamentals or if its outlook has changed. The Fund will focus on the sectors or industries that, in the sub-advisor's opinion, are key to India's rapid economic growth. These sectors may include software, pharmaceuticals, retail, infrastructure/real estate, manufacturing, banking, energy, telecommunication, metals and minerals, and others.

A WORD ABOUT RISK:

There is no guarantee that The Fund will achieve its investment objectives. The securities markets in the India region are substantially smaller, less liquid and more volatile than the major securities markets in the United States. The value of Fund shares will be affected by political, economic, fiscal, regulatory or other developments in the Indian subcontinent and particularly India, as well as fluctuations in currency exchange rates. The value of Fund shares also is sensitive to stock market volatility. The extent of economic development, political stability and market depth of different countries in the region varies widely. The Fund's share price is expected to be more volatile than that of a U.S. only fund.
